

STEEL BALLS FOR GRINDING

Steel Balls for grinding are produced in various diameters ranging from 40 to 120mm. Grinding Balls are used to assist in the extraction process for many metals such as gold, copper, lead, zinc, nickel, tin and silver.

TECHNICAL SPECIFICATIONS

TYPE:

Hot-Rolled Steel Balls for Grinding

FORM - DIAMETERS:

Diameters form 40 to 120mm

SURFACE HARDNESS:

As per Brinel & Rockwell

PACKING - WEIGHT:

Loose

DIAMETER TOLERANCES:

According to FN SPP
-02 -98
